PROFESSIONAL SUMMARY

API Development and Deployment Automation Specialist with 2+ years in software development. Expert in RESTful Web API development using C# and .NET Core. Strong background in containerization with Docker and Kubernetes, automated deployment pipelines, and DevOps practices. Proven ability to build scalable API solutions and streamline deployment processes for enterprise applications.

TECHNICAL SKILLS

Programming Languages: C#, Python, Linux Shell Scripting

Web Development: ASP.NET, .NET Core, .NET Web API, RESTful Services, JSON

Containerization: Docker, Docker Compose, Kubernetes, Ansible

DevOps and Automation: CI/CD, Automated Deployment, Nginx, Linux Shell Scripting

Databases: Microsoft SQL Server, MySQL

Cloud and Infrastructure: Linux, Windows, IIS, Nginx Proxy Manager

Development Tools: Git, Visual Studio, Postman

Message Queuing: Apache Kafka

PROFESSIONAL EXPERIENCE

RESEARCH SOFTWARE DEVELOPER

ARCON Tech Solutions, Mumbai | August 2023 - Present

API Development:

- Developed and maintained RESTful Web APIs using .NET Core and ASP.NET for enterprise security products including PAM, EPM, GRA, and MFA
- Built Common Library Framework for reusable API components improving development efficiency across multiple projects
- Designed and implemented Web-Based Trial Provisioning Platform with Angular frontend and .NET Web API backend
- Integrated automated email notification APIs with trial provisioning system
- Researched Apache Kafka implementation for asynchronous API communication and message queue processing

Deployment Automation:

- Containerized 6+ enterprise security products using Docker and Docker Compose for consistent deployment environments
- Configured Nginx reverse proxy for secure API routing and load balancing across containerized services
- Implemented Kubernetes orchestration for scalable container management and automated scaling
- Developed One-Click Installer tool using C# to automate IIS-based API deployments
- Created automated deployment scripts accepting JSON configurations for database, certificates, and web server setup
- Built dynamic provisioning system using Linux shell scripts for automated trial environment setup

Process Optimization:

- Automated 30-day trial instance provisioning through Web APIs reducing manual setup time by 90%
- Implemented database tracking and administrative controls for deployment monitoring
- Collaborated with Centre of Excellence team to optimize product delivery and deployment processes

- Awarded Merit Certificate for innovative trial provisioning platform

SOFTWARE DEVELOPER INTERN

ARCON Tech Solutions, Mumbai | January 2023 - August 2023

API Development:

- Completed comprehensive training in .NET Web API development and enterprise coding practices
- Contributed to Privileged Access Management API development and integration
- Implemented logging functionality across multiple API modules for monitoring and debugging
- Refactored legacy API code replacing error-prone conditional logic with robust exception handling

Research and Development:

- Conducted research on Linux command restriction APIs for file monitoring in Endpoint Privileged Management
- Evaluated feasibility of integrating monitoring capabilities as API-based product features
- Developed prototype agent-side implementation for endpoint security API controls
- Created dynamic sites, microservices, databases, and Windows services

EDUCATION

Bachelor of Technology in Computer Science

Vellore Institute of Technology, Amravati, India | Graduation Date: June 2023 | CGPA: 8.57

PROJECTS

Smart Tender Management System Using Blockchain

- Developed decentralized API platform using Java and Web3j blockchain integration
- Implemented smart contracts with Solidity and integrated with RESTful backend APIs
- Utilized IPFS for decentralized storage with API-based file management
- Achieved A grade for full-stack development project

CERTIFICATIONS AND ACHIEVEMENTS

Certificate of Merit - GRA Product Enablement, ARCON Tech Solutions, March 2025

Recognized for multi-product deployment optimization and infrastructure automation

Professional Development:

- AWS Summit on Generative AI - API development and automation insights
- Google Cloud Migration Conference - Cloud-native API deployment strategies
- PwC Microsoft CoPilot Conference - AI-powered development and deployment automation

Business Impact:

- GSC Bank POC Collaboration - Delivered successful API proof of concept contributing to business deal acquisition
- Innovation Award - Merit certificate for automated trial provisioning platform

ADDITIONAL INFORMATION

Languages: English, Hindi, Telugu

Professional Memberships: Computer Society of India , VITAP (2019-23) - Vice-President
